

## BASIC RULES FOR USE IN THIS SCAFFOLD

ALWAYS CHECK that the scaffold has been signed off SAFE within the last 7 days before use (Back of the Tag).

DO NOT ALTER the scaffold for any reason. Please contact the site management to organise this for you.

ALWAYS WORK within the handrailed platforms.

DO NOT tie or secure back any Gates or Access Openings.

If the scaffold is **2.1m high or higher**, it must have either of the following:

- Ties from the scaffold to the building
- Rakers/Buttress from the scaffold to the ground.

YOU MUST NEVER remove or alter these ties and rakers under any circumstance because these are the key components that prevent the scaffold from tipping over or worse.
